School & Major : NUS Business Analytics Year 2 undergraduate

Cover Letter for Internship Application

Dear Sir/Madam,

I am currently a Business Analytics year 2 student in NUS with expected Honors(Distinction). I possess strong background in multiple coding languages like Java, Python, SQL, R, and more. As I am currently looking for an internship(able to start whenever deemed necessary), I would love to have an opportunity to join your organisation.

During my academic journey, I have developed an intense enthusiasm for software engineering and data analysis. To further cultivate my interests, I have taken various courses beyond my formal education, including ones on statistical modelling and data visualization. Although I don't have any professional experience, I have been working on personal projects and attended competitions to showcase my passion for the field and demonstrate my hands-on skills.

I am drawn to your company due to its renowned innovation and dedication to utilizing digital technology to drive business success. Additionally, I have received positive feedback about the knowledgeable and passionate mentors who support and guide trainees to succeed within the company. With my strong interpersonal skills, I am confident that I will be adaptive to your work environment and make a significant contribution to your organization.

The attached file is my resume and relevant work experience. Once again, thank you for considering my application. If you need any additional information or would like to have a more in-depth conversation about my qualifications, please feel free to reach out to me. I would be delighted to assist you.

Regards,

Nicholas
